

# Nikhil Kapleshwari

## Senior Software Developer

📞 8097367638 @ nikhil.kapleshwari@gmail.com 🔗 <https://nikhilkapleshwari.github.io/portfolio/> 📍 Mumbai

### SUMMARY

Skilled developer who can bring diverse skill set to application development along with strong analytical and creative problem-solving abilities.

More than 8 years of experience in software development industry major business domains like Finance, Banking and Telecom.

### EXPERIENCE

## Senior Software Developer

Cisco Systems 11/2019 - Ongoing Pune, India

5g-PCF (Policy Control Function)

- Policy Control Function in 3gpp network architecture governs network behaviour by providing policy rules to control function(s) to enforce them.
- Worked extensively in development & maintenance of java application in event driven microservice architecture, async processing with grpc & MongoDB as a database.
- 2+ years of hands-on experience of docker, Kubernetes & helm charts for managing deployment processes on local & other testing environments.
- Exposure of working with US team for maintenance activities along with debugging production & performance issues.

## Software Developer

BNP Paribas India Solutions 12/2016 - 11/2019 Mumbai, India

ARROW-DOME(Domestic Payment processing system)

- DOME is an event driven, batch processing payment engine to process domestic payments of BNP Paribas in European countries for a replacement of existing legacy payment system.
- Researched, designed and developed java batch processes for this payment system from scratch using components like Apache camel, ActiveMQ, CXF & Quartz.
- Involved in development of DOME GUI which is a Spring based web application as an interface to manually intervene the payment processing operations.

## Software Engineer

Tata Consultancy Services 12/2013 - 12/2016 Mumbai, India

NSE-NGCD(New Generation Currency Derivatives)

- Worked as a developer in a migration project for a login module of NGCD trading system from C/C++ to java on a Linux platform.
- Worked extensively on changed requests and involved in production support activities of Currency and Equity derivatives trading system.
- Developed a web portal to automate trading system related tasks, operations and report generation process. Worked with client like NSE and gained functional & business knowledge of a trading system.

### SKILLS

## Development/Frameworks

java 8

Spring boot

Rest API

JPA/Hibernate

mongoDB

Angular 4

## Devops

Docker

Kubernetes

Helm charts

Jenkins

### EDUCATION

## BE Information Tech.

Mumbai University

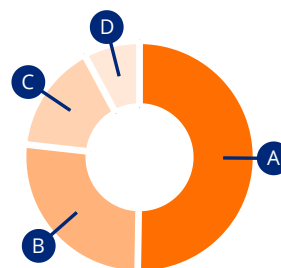

2009 - 2013

GPA 70% / 100

### CERTIFICATION

AWS Certified Solution architect associate

### MY TIME

- A App development
- B Devops
- C Front end/ web development
- D maintenance & support

### PASSIONS

♥ Cricket, Football, games & travelling.
